

## Battery

### Tools

This procedure requires the following tools:

- Soft cloth

### Part Location

### Preliminary Steps

**Warning:** Always shut down the computer before opening it to avoid damaging its internal components or causing injury. After you shut down the computer, the internal components can be very hot. Let the computer cool down before continuing.

---

## Procedure

**Warning: If the computer has been recently operating, allow it to cool down before performing this procedure.**

1. Shut down the computer.
2. Disconnect the power cord and any other cables connected to the computer.
3. Place the computer face down on a soft cloth.
4. Slide both battery latches away and lift the battery out of the battery bay.
